

COMMS-TEK HUNTER™

Hunter™ is the new generation of smart and powerful mobile phone detection, capable of detecting every phone band in any country.

- Configurable to detect any phone band between 400MHz and 6GHz worldwide, including 5G. Simply select your region profile and start to hunt.
- Detects all phone transmissions including calls, SMS Texts, TDD data transmissions and even registration signals.
- Displays the service provider, signal strength and time and date of detection in an instant log.
- Easy-to-use controls designed for 'pick up and go' use. Requires minimal training.
- Switchable dual antenna system. Omni-directional to find activity, and directional to track down individual phones.
- Large 5.5" AMOLED display with HD touch screen.
- Long battery life- internal battery supports over six hours of continuous mobile operation.
- Military spec hard anodised machined aluminium enclosure with hand straps.
- Vibration and audio alerts either through built-in speakers or attachable earbuds.

Model	Hunter™
Display and Control	5.5 inch, 1920x1080, HD AMOLED backlit display with capacitive touch screen Power on button
Cellular Data Presentation	Signal detection log on user interface displays: Network service provider Signal level Frequency Time and date of detection Downloadable daily log file available when connected to PC via ethernet cable, using a web browser.
Distance Range of Detection	Up to 175 feet indoors (53 meters) Up to 1000 feet outdoors (300 meters) Ranges can differ depending on target signal strength and external factors such as physical environment
Frequency Range	Programmable to any cellular band from 400MHz to 6GHz Frequency bands software selectable
Signal level alert selection	High medium and low sensitivity mode Signal threshold selectable
Receiving Modes	Cellular, WiFi/Bluetooth
Dynamic Range	80 dB
Sensitivity	-80 dBm
Bandwidth Resolution	0.2 MHz
Maximum Signal Input	0 dBm
Detector resolution	2db
Frequency identification	+ - 0.5MHz
Antennas	Omnidirectional Broadband Antenna Directional Broadband Antenna Touchscreen selectable
Power Requirements	USB C Adapter, 5V 3A, included with accessories
Battery	Rechargeable Lithium-Ion. Run Time: 6 hours. Charging time: 7 hours from empty Can be used on mains power for continuous operation
Enclosure Dimensions	Width = 205mm - 8" Height = 125mm - 4.9" Depth = 55mm - 2.1"
Enclosure type	Military Spec Machined Aluminium, hard anodised Hand-strap
Weight	1170g excluding antennas
Ports	USB C for power supply GIGA Ethernet for communication to PC 3.5mm audio jack
Alerts	Speaker for sound alert Vibration disk for haptic feedback Battery charging LED
Included Accessories	USB C Power supply Hand straps Earbuds Ethernet cable Directional broadband antenna Omni broadband antenna Padded carry case with detachable shoulder strap
Software updates	Software updates can be received by email and uploaded into the Hunter with an ethernet cable, using a standard web browser
Frequency band updates	Frequency bands updates can be received by email and uploaded into the Hunter with an ethernet cable, using a standard web browser
Warranty	1 year
